

23 October 2024

ASX Release

QUARTERLY ACTIVITIES REPORT

For the Quarter ended 30 September 2024

HIGHLIGHTS

- Heritage agreement finalised at Lennon's Find and Heritage ground clearance completed.
- IP survey completed at Lennon's Find in September 2024.
- Significant IP anomalies identified at the Tiger and Hammerhead Prospects Lennon's Find.
- Detailed data review in progress at Mulga Rock Uranium Project in WA.
- Share Purchase Plan (SPP) completed, raising \$600k after shortfall completed.
- Company's cash balance as at 30 September 2024 of \$827k plus investment of \$95k in Godolphin Resources Ltd.

Orange Minerals NL (ASX: **OMX**) ("**Orange Minerals**" or "the **Company**") is pleased to provide shareholders with the following Quarterly Report for the three-month period ended 30 September 2024.

Corporate

On 30 September 2024, Orange had a cash balance of \$827k and an investment in ASX listed Godolphin Resources Limited (ASX: GRL) (Godolphin) valued at \$95k.

A successful Share Purchase Plan was completed in September 2024 which raised \$600k after completion of shortfall.

During the September Quarter, Orange had corporate costs to support active exploration work over the tenements. Exploration costs for the quarter included costs related to field work at the Lennon's Find and Majestic (Eastern Goldfields) Projects WA, and costs to maintain all tenements in NSW and WA in good standing.

Orange will actively support and maintain exploration programs that target high value tenements with the potential discovery of significant orebodies in the Lachlan Fold Belt of NSW and the Eastern Goldfields and Pilbara of WA.

In late August 2024, David Greenwood tendered his resignation as Managing Director of Orange and he will leave the company on 30th November 2024.

Operational Highlights

Lennon's Find Project (Orange earning 75%)

Summary

In August 2023, a binding term sheet was entered into with Musketeer Mining Ltd to acquire up to a 75% share in the Lennon's Find Polymetallic Project 75km south-east of Marble Bar in the Pilbara region, WA (Figure 1). Lennon's Find includes a Mining Lease with an Inferred Mineral Resource of 1.55 Mt at 5.9% zinc, 0.2% Cu, 1.6% Pb, 0.28 g/t Au, and 84g/t Ag (Optiro 2019).

Orange can earn 51% of the Lennon's Find Project (M45/368) by spending A\$500,000 by 31 March 2026 (includes an upfront payment of A\$200,000). Orange must spend a minimum of \$200,000 on exploration at Lennon's Find (including 500 metres of drilling) by 31 January 2025. Orange may earn up to 75% of the Lennon's Find Project by spending an additional A\$500,000 (A\$1.0 million in total) by 31 March 2028.

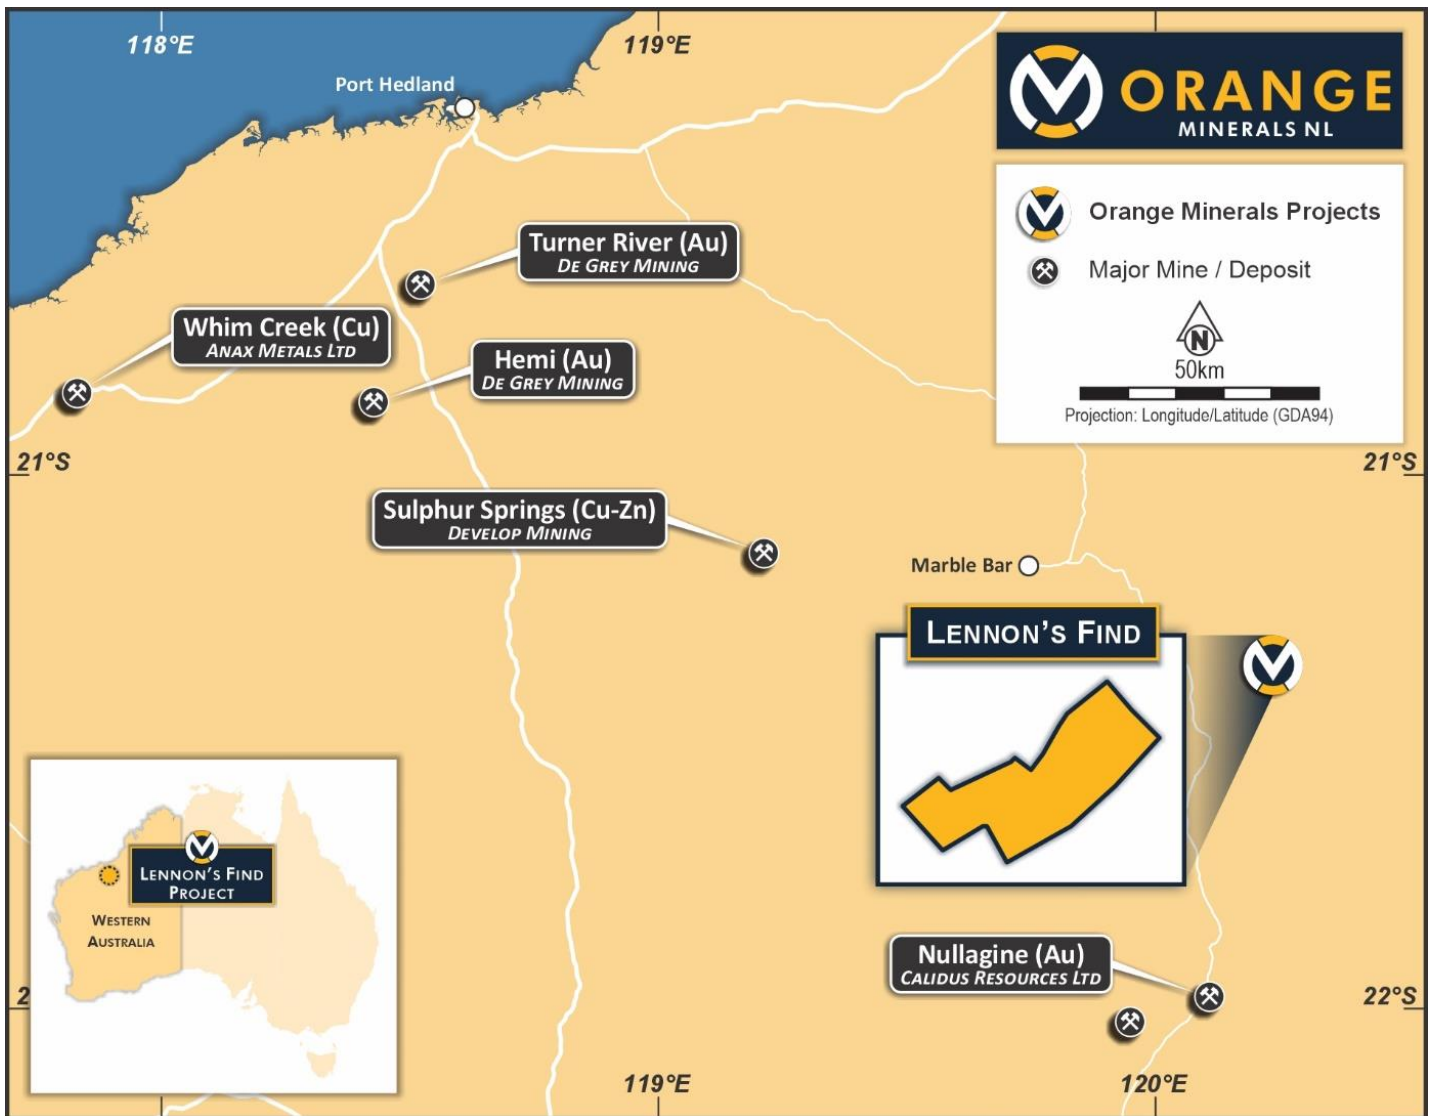

Figure 1 – Location Map of Lennon's Find Project

Significant untested exploration targets exist below and adjacent to the Resource. An offset pole-dipole induced polarization survey, orientated NW-SE across the Hammerhead resource, was completed in April 2018 by Resource Potentials Pty Ltd. The survey successfully identified a deep IP chargeability anomaly response positioned down dip and to the SE of the resource. In 2023, an independent geophysical consultant conducted a review of the historical Lennon's Find geophysical data. To fully confirm and better define historical anomalies, the consultants recommended that a new IP survey be commissioned to extend the IP lines over the mineralised zone and to survey a second IP line to the south-west.

Work completed at Lennon's Find Project in September Quarter 2024

Significant work was completed at Lennon's Find during the September quarter 2024. A Heritage Agreement over Lennon's Find with the local Aboriginal Group was finalized, which was followed by Heritage Clearance of the ground in late August 2024. An IP survey at Lennon's Find was completed in September 2024. The aim of the survey was to extend the previous IP work and to better define the deeper chargeability anomaly at the Hammerhead deposit, plus identify any anomalous chargeability responses at the Tiger deposit that could be targeted with follow-up drilling.

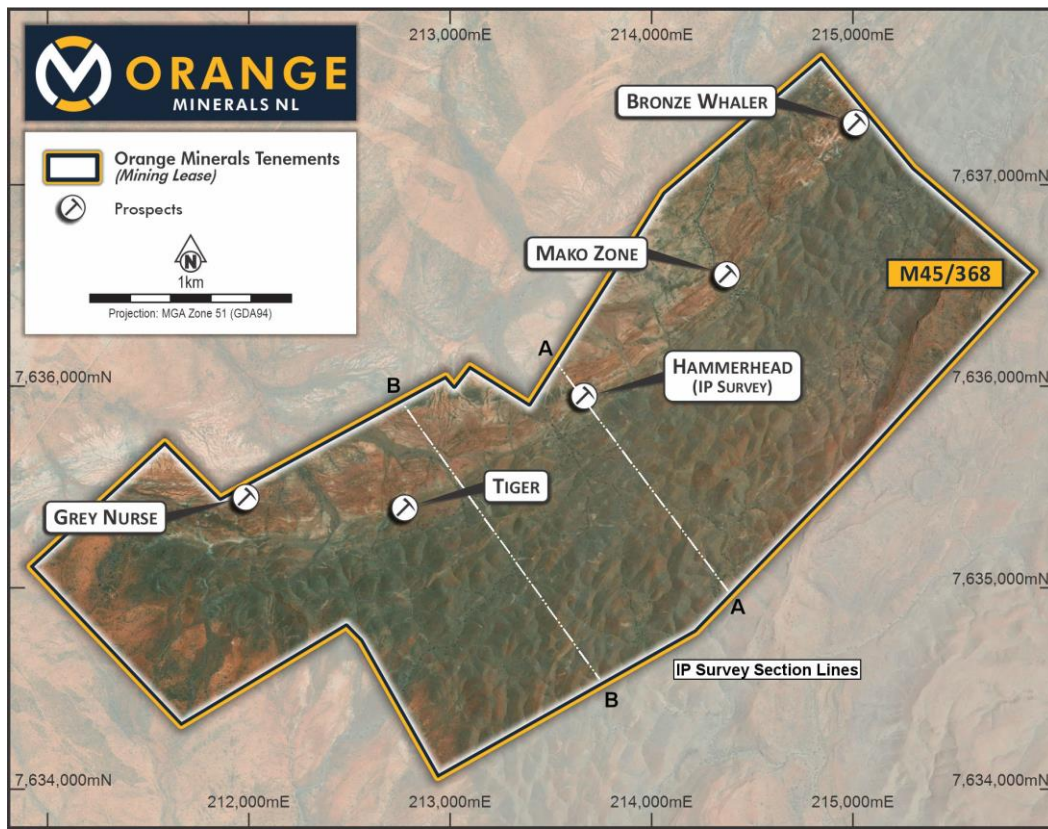

Figure 2 – Lennon's Find Mining Lease M 45/368

Post quarter end, results of the IP survey were received (see ASX announcement 16 October 2024) which were extremely positive. The new IP survey at Hammerhead has confirmed and further refined the strong chargeability anomaly from the 2018 survey (see Figure 3).

Figure 3 – Hammerhead A-A section view of chargeability inversion with drill traces highlighting Zn grade in hotter colours – looking NE

The IP survey results at Tiger SE defined shallow chargeable responses that may represent untested base metal mineralisation in the footwall of the deposit (Figure 4).

Figure 4 – Tiger SE B-B section view of chargeability inversion with drill traces highlighting Zn grade in hotter colours – looking NE

Based on the results of the IP survey, Orange Minerals is proposing a 500m diamond drill program to test the deep chargeability anomaly at Hammerhead and test the potential for parallel zones in the footwall of the Tiger SE deposit. The drilling will test the Hammerhead target approximately 350m below surface.

Eastern Goldfields Projects, WA

The Eastern Goldfields Project is located approximately 50km east of Kalgoorlie in the area around the Majestic, Kurnalpi and Mt Monger gold mining centres. The project comprises four granted exploration licences, one granted mining lease and forty-four granted prospecting licences (collectively the 'WA Project Area' Figure 5). The tenements have been broken down into two distinct projects, a northern Kurnalpi Project and the southern Majestic Project.

In early 2024, a drill programme tested four key areas at the Kurnalpi/Majestic project i.e. tenements E 28/2294, P 25/2268, P 26/4415 & E 25/591. The drill holes targeted significant gold intercepts in historical drilling, known mineralised structures and prominent outcropping quartz veining with anomalous rock chips (Burton Dam). Six reverse circulation (RC) drill holes were completed with a total of 1,024 metres drilled. Gold was intersected in all RC drill holes (see ASX announcement 20th March 2024).

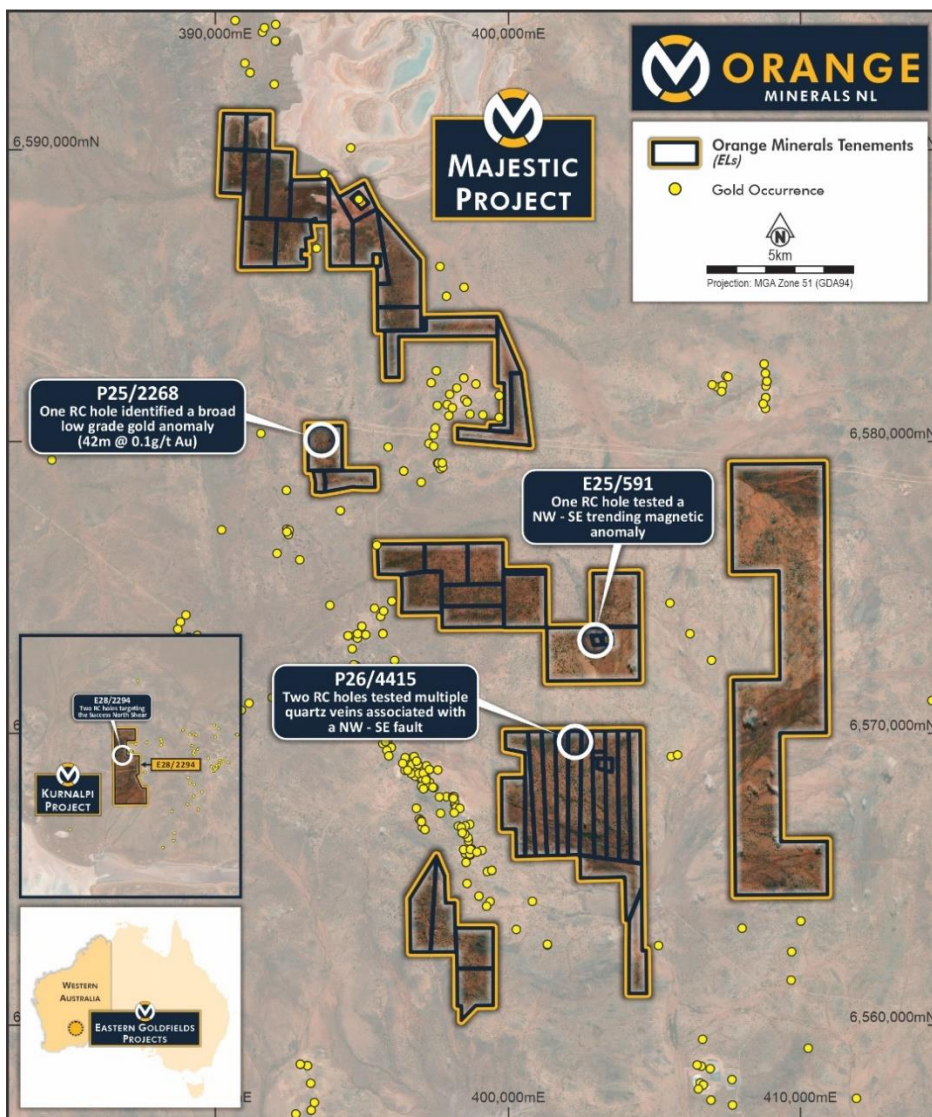

Figure 5 – Eastern Goldfields Tenements

Work completed at Majestic/Kurnalpi during September Quarter 2024

Following on the drill programme undertaken earlier in 2024, further field work was undertaken, which included surface mapping and rock chip sampling on the Majestic tenements P 26/4470, P 25/2361, P 25/2570 and P 26/4416 - 20. A follow-up drill programme at Majestic will be considered for 2025.

Mulga Rock, WA

Orange has applied for six exploration licenses totalling 1,234 km² surrounding Deep Yellow Limited's (ASX: DYL) advanced Mulga Rock deposit in WA (see ASX announcement 29 April 2024). The Mulga Rock uranium deposit owned by Deep Yellow Ltd contains a total Resource of 115.1Mt @410ppm for 104.8Mlb U₃O₈ (see DYL ASX Announcement 26 February 2024). This positions Mulga Rock as one of the largest, undeveloped uranium projects in Australia. Deep Yellow has also identified significant project value upside at Mulga Rock through the potential recovery of critical minerals including Rare Earth Oxides. Deep Yellow is currently undertaking a revised DFS, expected to be completed in Q2 2024.

Orange has applied for six tenement applications (E 39/2479, E 39/2480, E 39/2481, E 39/2482, E 28/3449 and E 28/3450) surrounding the Mulga Rock Deposit, in relatively underexplored areas considered to have significant potential to host similar paleo-deposits (Figure 4) prospective for Uranium and rare earth metals.

Mulga Rock is a series of paleo-channel uranium deposits located within a regionally extensive paleo-drainage system. Mineralogy is diverse with a number of critical minerals being present in addition to uranium.

The main uranium accumulation within each deposit occurs as a sub-horizontal body found mainly in carbonaceous sediments of lignite and clays. It is hypothesised that uranium and base metals were transported laterally from source materials by acid rich meteoric flow, with metals deposited in favourable host rocks close to the water table. At Mulga Rock, mineralisation typically commences at shallow depths of 30-60m. The main exploration techniques used to locate the deposits in the Mulga rock area are geochemistry, geophysics (downhole, surface and airborne) and drilling (mainly AC/RC).

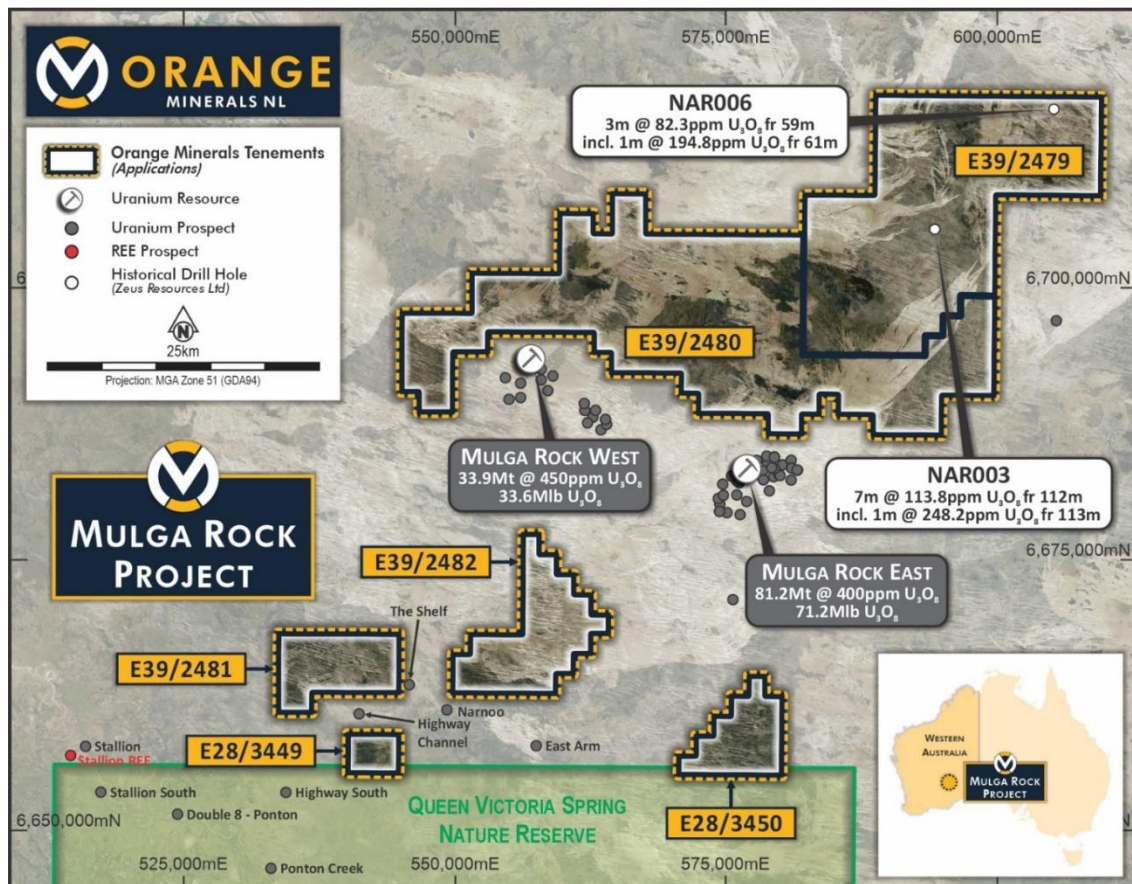

Figure 6 – Tenement Applications around Mulga Rock

There is limited historical exploration and drilling within tenement application areas.

Previous exploration in the area of Mulga Rock has identified a number of paleochannels and tributaries believed to be responsible for carrying the uranium and metals rich fluids. Orange made the applications around Mulga Rock as it believes that extensive paleochannels may exist within these tenement applications. Much of these areas are underexplored, however, in desktop work undertaken to date there are a number of significant historical drill intersections containing uranium which require following up.

Work completed at Mulga Rock during September Quarter 2024

The compilation of the historic database for Mulga Rock was completed during the September quarter with GIS datasets prepared covering the Minigwal and Cundeelee 250k map sheets. The database contains historical drilling, surface geochemistry and geophysical programs relevant to the OMX tenements. The data will be invaluable as a base for initial exploration program planning once the tenements have been granted. Various historical geophysical data sets will be combined and reinterpreted to assist targeting.

Calarie Project (Orange 51%, earning 70%)

Calarie is a mining lease (ML739) and two exploration licences (EL8555, EL8580) that form a 70% earn-in joint venture with Godolphin Resources Limited. The project area is located immediately north of Forbes in Central NSW (Figure 5). A maiden Resource was announced at Calarie in the March Quarter 2023.

Calarie Deposit - Mineral Resource Estimate (Au 0.3 ppm cut-off)			
Classification	Tonnes (Mt)	Au (ppm)	Au (Ozs)
Inferred	0.87	1.83	50,796

During the September 2024 quarter, land holder negotiations continued on EL8580 and EL8555 to the north of the Calarie Mining Lease (ML) area, with a view to initiating exploration along the structural corridor north of the ML.

In this regard land access agreements were finalised with two landowners.

Figure 7 – Map of Calarie – Project Region

Wisemans Creek Project (Orange 100%)

The Wisemans Creek project is located in the south-east of the Company's NSW Project area. The project is comprised of four granted exploration licences including (EL8554) see Figure 7.

The project area is the largest zone of gold anomalism in EL8554 and contains several historical workings. Numerous historical exploration activities have taken place across six main gold bearing areas with associated base metal mineralisation, being Northwest Ridge, Trig Zone, Central West, Central North, Black Bullock and Mount Gossan.

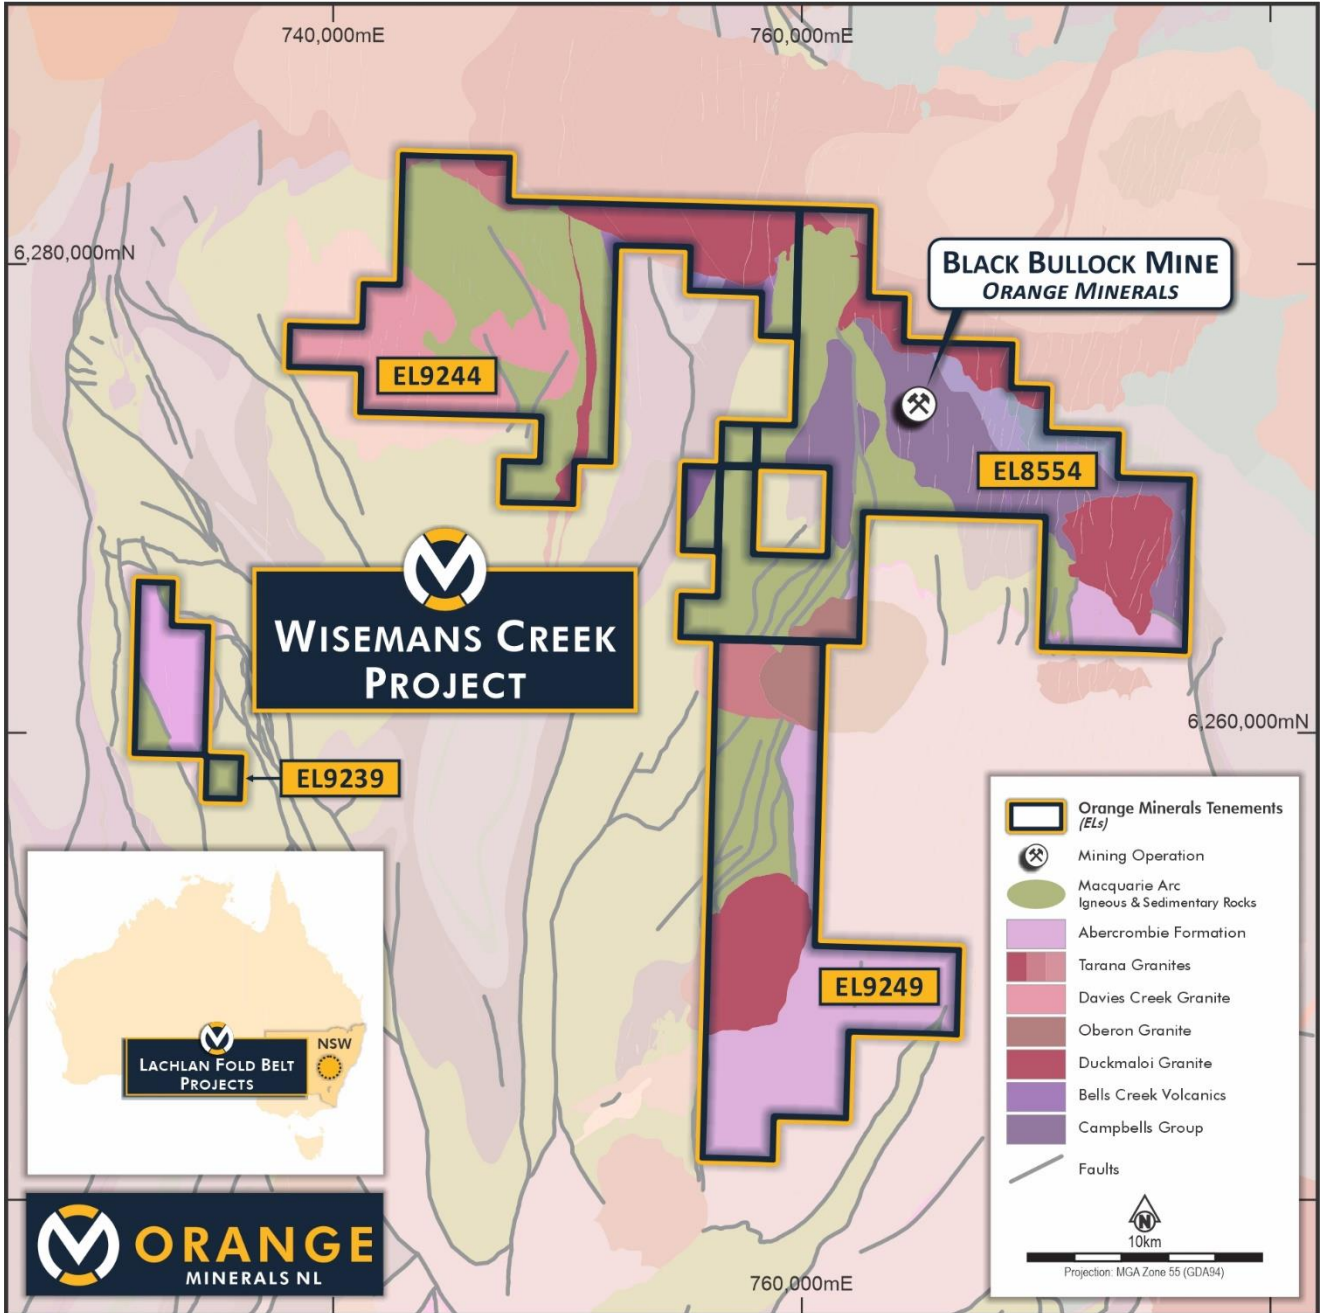

Figure 8 – Map of Wisemans Creek Project

In May 2022, Orange completed an initial diamond drill programme at Wisemans Creek (EL8554) drilling four diamond holes for a total 618 metres. Assay results from this drill programme were received in August 2022 included a significant gold intersection in OWCD004 (24.6m @ 1.30 g/t Au) associated with an extensive quartz breccia zone containing quartz veining and strong sericite/ carbonate alteration (see ASX announcement 28 August 2022).

A phase 2 diamond drill programme at Wisemans Creek Project (Wisemans) in NSW was completed in early May 2023, with four holes drilled for 607.5m. The phase 2 drilling tested two target areas, namely The Northwest Ridge and Central West areas. In the September quarter 2023 Orange received assay results from the four Phase 2 diamond drill holes which included a number of significant gold assay results.

Work completed at Wisemans Creek during September Quarter 2024

During the September 2024 quarter no field work was undertaken on EL9244, EL9239 & EL9249. Tenement renewal applications were made for EL9244, EL9239 & EL9249 and are currently pending with the NSW Resources Assessments and Systems.

Summary of Exploration Expenditure (ASX Listing Rule 5.3.1)

Pursuant to ASX Listing Rule 5.3.1 the Company advised the cash outflows on its mining exploration activities reported in 1.2(a) of its Appendix 5B for the September 2024 quarter are as follows:

Exploration activities on NSW licences:	\$84,079
Exploration activities on WA licences:	\$349,572

Mining Production and Development (ASX Listing Rule 5.3.2)

There were no substantive mining production and development activities during the quarter.

Payment to Related Parties (ASX Listing Rule 5.3.5)

The Company advises that payments to related parties included in section 6.1 of the Appendix 5B report relate to Director Fees and Executive Management fees.

The mining tenement interests acquired or relinquished during the quarter and their location

Tenements surrendered in Sept Qtr were P25/2363, P25/2582, P25/2677, P25/2678, P25/2679, P25/2680, P25/2721, P25/2722, P26/4421, P26/4422 all from the Majestic Project in WA.

This ASX announcement has been authorised for release by the Board of Orange Minerals NL.

About Orange Minerals NL

Orange Resources NL is an exploration company listed on the ASX (ASX: OMX) with Australian-based projects in the Lachlan Fold Belt (LFB) of NSW and Eastern Gold Fields of WA, both world-class mineral provinces. The LFB of NSW hosts major mines including Cadia/Ridgeway, North Parkes and Lake Cowal and the tenements in the Eastern Goldfields of WA are close to the Daisy Milano gold mine and Black Cat Resources Majestic Project. The Orange Minerals exploration team plan to rapidly explore its tenement packages with aggressive exploration programmes at its key properties. The company is currently focussing on the Calarie & Wisemans Creek Projects in NSW and the Majestic/Kurnalpi and Lennon's Find tenements in WA.

Competent Persons Statement

The information in this report that relates to Exploration Targets, Exploration Results, Mineral Resources or Ore Reserves is based on information compiled by Phil Shields, a Competent Person who is a Member of the Australian Institute of Geoscientists. Mr Shields is an employee of Orange Minerals NL and has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. Mr Shields consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

Forward Looking Statement

This release includes forward – looking statements which involve a number of risks and uncertainties. These forward-looking statements are expressed in good faith and believed to have a reasonable basis. These statements reflect current expectations, intentions or strategies regarding the future and are based on current assumptions. Should one or more of the uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary from the expectations, intentions and strategies described in this announcement. No obligation is assumed to update forward looking statements if these beliefs or opinions should change.

8.7 Estimated quarters of funding available (item 8.6 divided by item 8.3)	1.35
<i>Note: if the entity has reported positive relevant outgoings (ie a net cash inflow) in item 8.3, answer item 8.7 as "N/A". Otherwise, a figure for the estimated quarters of funding available must be included in item 8.7.</i>	
8.8 If item 8.7 is less than 2 quarters, please provide answers to the following questions:	
8.8.1 Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?	
Answer: Yes	
8.8.2 Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?	
Answer: the Company partially completed the SPP announced during the quarter. After completing the shortfall and raising the intended amount the Company is confident in its ability to raise the funds required to continue its operations.	

Mining exploration entity or oil and gas exploration entity quarterly cash flow report

8.8.3 Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?

Answer: Yes, for the reasons listed at 8.8.2 above

Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.

Compliance statement

- 1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.
- 2 This statement gives a true and fair view of the matters disclosed.

Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
